

- ① Dashboard - → feature.
- ① classic Dashboard. - XML
- ② Studio Dashboard. - json - 8.2.X
- ↓
- Cosmetic part

## Dashboard optimization:-

- ① Query writing.

① Dedup command - remove duplicate value.

② Minimize the number of pipe -

③ Dedup - used as early as possible.

④ Rename command → change the name of field

search level  
last → (Hickel, state)

↓  
Hickel, state

per 99

⑤ join/lookup → field name should be same

↓  
Field Alias

⑥ permission →

Studio → - json

union with data/features.

Studio → Jon

↳ lot of automation wrt data/features.
